Diego Vergara

Software Developer

Santiago, Chile | diegovher1@gmail.com | github.com/dvher | linkedin.com/in/dvher | dvher.github.io/portfolio

SUMMARY

Software developer with 3+ years of professional experience building internal tools, client-facing web applications and API integrations in Python (Django, Flask) and Java. Earlier background in web and infrastructure penetration testing under OWASP. Comfortable with Linux, Docker and self-hosted deployments. Native Spanish, advanced English.

EXPERIENCE

Teamcore S.A. — Junior Software Developer Nov 2023 – Present

Santiago, Chile

- Build and maintain internal tools used daily by the company and web applications used by its clients, in Python (Django, Flask) and Java on Apache Tomcat.
- Develop API integrations in Python between company systems and external services.
- Built a Mercado Público scraper in Python (requests, MySQL, Django) that downloads the latest public-procurement data and validates and cleans it.

EKMA (ekma.cl) — Freelance Full-Stack Developer Ongoing

Construction and minor civil works company

- Built the company's whole website, end to end with Hugo, served by nginx in Docker on a VPS, and keep it running to this day.
- Contributed to SEO work that made the company more visible on Google.

ITSec S.A. — Cybersecurity Engineer Jan 2022 – Oct 2022

Santiago, Chile

- Performed web application and infrastructure penetration tests with Burp Suite, Nmap and other standard pentesting tools, following the OWASP framework.
- Mitigated vulnerabilities and contributed to preventive hardening.
- Built internal applications that supported the security team's work.

PROJECTS

Personal projects, mostly built for my own and my family's use. Some were developed with AI assistance and reviewed by me.

Pogo and Pogo Pad | github.com/dvher/pogo
Markdown sticky notes for the desktop (Go, Wails, Svelte) with a self-hosted sync server (Go, SQLite, Docker) and an Android widget (Kotlin). Notes encrypted at rest (AES-256-GCM), optional end-to-end sync encryption (Argon2id). Open source.

Grades Calculator | github.com/dvher/grades_calculator
Offline-first grade calculator for web, Android and iOS (TypeScript, Kotlin, Swift) with an optional self-hosted sync server (Fastify, PostgreSQL). All three implementations are checked against shared test cases. Open source.

Leaf | private repository
Minimal e-reader for Android, iOS, desktop and web (TypeScript, Capacitor, Tauri, Rust) supporting EPUB, MOBI, PDF and CBZ, with sync over WebRTC or a shared folder.

ReqTUI | github.com/dvher/reqtui
Terminal HTTP client in Go, a lightweight Postman alternative, with pluggable auth (API key, OAuth2, AWS SigV4). Work in progress.

3D Viewer | github.com/dvher/3d_viewer_app
Mobile app (React Native, Expo, three.js) to view and compare 3D models, with a diff mode that overlays two models.

SKILLS

Languages: Python, Go, TypeScript, JavaScript, Java, Rust, C, C++, PHP
Backend and web: Django, Flask, Fastify, React, Svelte, Hugo, Apache Tomcat, REST APIs, web scraping
Databases: MySQL, PostgreSQL, SQLite
Infrastructure: Linux (NixOS), Git, Docker, nginx, Nix, Terraform, VPS and cloud hosting
Security: OWASP, web and infrastructure pentesting, Burp Suite, Nmap, hardening

EDUCATION AND LANGUAGES

Universidad Diego Portales — Civil Engineering in Computer Science and Telecommunications (Ingeniería Civil en Informática y Telecomunicaciones) 2019 – 2025

Languages: Spanish (native), English (advanced)
